☎ +46 761702675

📍 Uppsala, Sweden

## ABOUT ME

Full Stack Developer with a burning passion for video games and programming. In my spare time I like to play video games, go skateboarding, spend some time in the gym, read books or do some programming.

## EDUCATION

**2015 Seoul's National University**  
Master's Program in Computer Science

**2014 Uppsala University**  
Master's Program in Computer Science

**2011 Blekinge Institute of Technology**  
Bachelors Program in Computer Science

## SKILLS

### Software Development

Microservices, Scrum, Agile Development,  
Test Driven Development

### Technologies & Frameworks

React, Redux, NodeJS, Material-UI, REST,  
Elasticsearch, Webpack, DirectX, Unity,  
Android Studio, Spring, Apache Kafka,  
Apache Flink, Jest, Storybook

### Programming Languages

JavaScript, Java, C/C++, C#, Python,  
Erlang, PHP, HTML, CSS, SQL, JSON,  
XML

### Databases

MySQL, NoSQL, PostgreSQL, RocksDB

## WORK EXPERIENCE

**Omicle AB** Uppsala 2019 –

### Founder & Full Stack Developer

Early stage startup project done in my spare time with a close friend of mine. Brings optimization and automatization to freight forwarders.

<https://omicle.se/>

**Retriever** Stockholm 2017 - 2018

### Systems Developer

Developed a vehicle information service for their customer web portal. Vehicle data was fetched from Transportstyrelsen, Java back-end, and front-end in React and Redux.

Developed a back-end service in Java that retrieves annual reports for Swedish condominiums.

Developed a web service in Java that automatically fetches concern data from Retrievers own database, formats it, and sends it to one of Skatteverket's servers.

Developed, in a team of three, a complete ecosystem of services that fetches articles and company data from various Swedish sources, such as news articles and TV/radio programs. The front-end was written from scratch mainly in React, and customers would use the service to monitor different signals (such as keywords) from various sources.

**King** Stockholm 2016 - 2017

### Master's thesis

Developed a prototype of a debugging tool for a real-time, clustered, data stream processing system using Java back-end, JavaScript front-end. Other frameworks used were Apache Kafka, Apache Flink and RocksDB.

**Nasdaq** Stockholm 2015

### Front-end developer (Internship)

Developed one of their front-end systems in Java using the Spring Framework.

**Ericsson** Karlskrona 2014

### Software developer (Internship)

Developed a prototype of a sizing tool that would be used for efficient server hardware planning.

## HOBBIES
